Professional Summary

Sustainability-focused data analyst with hands-on experience in renewable energy, solar power analytics, and environmental data analysis. Skilled in Python, Excel, Power BI, and climate data interpretation to drive eco-friendly decision-making.

Core Skills

- Python
- Data Analysis
- Solar Energy
- Renewable Energy
- Sustainability
- Environmental Data
- Excel
- Power BI
- Climate Analytics
- SQL

Technical Skills

- Data Tools: Excel, Power BI, Pandas, NumPy
- Domains: Solar Energy, Wind Energy, Climate Change, Sustainability
- Reporting: ESG Metrics, Sustainability Reports

Education

B.Tech in Environmental Engineering
XYZ Institute of Technology, India
2022 – 2026

Projects

Solar Energy Performance Analysis

- Analyzed solar power generation data using Python and Excel
- Built dashboards in Power BI to track efficiency and sustainability impact
- Evaluated renewable energy performance metrics

Climate Data Analysis Project

- Worked with environmental datasets related to climate change
- Applied statistical methods to analyze carbon emissions
- Produced sustainability reports for decision-making

Internship Experience

Sustainability Analyst Intern
GreenTech AI Solutions
June 2024 – Aug 2024

- Assisted in analyzing renewable energy data
- Supported ESG and sustainability analytics
- Used Python and Excel for reporting

Certifications

- Renewable Energy Systems – Coursera
- Python for Data Analysis – Udemy
- Sustainability & Climate Change – edX

Career Objective

To contribute to green technology initiatives by applying data analytics and sustainability expertise in renewable energy projects.
